

**COMBINATION OF  
EXTERNAL WEATHER  
LOUVRE AND NON-  
RETURN DAMPER,  
VARIANT WG-AL-KUL-1**

## WG-KUL

### COMBINATION WITH A NON-RETURN DAMPER

Combinations of external weather louvres and non-return dampers as a protection against the direct ingress of rain, leaves and birds, and to prevent air from flowing against the intended airflow direction.

- Maximum width of 2000 mm, maximum height of 1665 mm
- Low differential pressure due to aerofoil blades
- Low air-regenerated noise
- All aerodynamic data is measured in aerodynamics and acoustics laboratories
- Maximum differential pressure: 100 Pa
- Available in standard sizes and many intermediate sizes
- Pre-assembled combination, hence fast and easy to install

#### Optional equipment and accessories

- Installation subframe
- Insect screen
- Powder-coated or anodised surface

## Application

### Application

- Combinations of Type WG external weather louvres and Type KUL non-return dampers for protecting fresh air and exhaust air openings in air conditioning systems
- Protection against the direct ingress of rain as well as against leaves and birds
- Recommended face velocity for fresh air openings: 2 – 2.5 m/s max.
- Prevention of unwanted airflows against the intended airflow direction when the system is not in operation
- Blades close automatically when the system is shut down

### Special characteristics

- Any intermediate sizes within the standard size range are available
- Low installation effort on site since external weather louvre and non-return damper are factory combined and assembled
- Operating temperature 20 – 80 °C
- For very large sizes, several combinations can be arranged side by side or on top of each other
- Maximum pressure of 100 Pa
- Low differential pressure due to aerofoil blades
- Non-return dampers are opened and closed by the airflow; no actuator is required

### Nominal sizes

- B: 200 – 1600 mm, in increments of 1 mm
- H: 180, 345, 510, 675, 840, 1005, 1170, 1335, 1500, 1665 mm (intermediate sizes 183 – 1664 in increments of 1 mm)
- Any combination of B × H

## Description

### Variants

- WG-KUL: External weather louvre made of galvanised sheet steel, with non-return damper

- WG-AL-KUL: External weather louvre made of aluminium, with non-return damper
- 1: Fresh air opening
- 2: Exhaust air opening

#### Parts and characteristics

- Border
- Regular blades and bottom blade
- Wire mesh
- Optional insect screen
- Visible mullion or stabilising mullion at the rear, from B = 1385 mm
- Casing of non-return damper
- Blades with low-friction bearings
- Blade restrictors
- Blade tip seals
- Bottom travel stop (angle section)
- Visible mullion at the rear from B = 1000 mm

#### Accessories

- Installation subframe: Installation subframe for the fast and simple installation of external weather louvres

#### Construction features

##### External weather louvre

- Free area of approx. 60 %, with insect screen approx. 45 %
- Wire mesh at the rear, mesh aperture 20 × 20 × 1.8 mm
- Optional insect screen at the rear, mesh aperture 1.25 × 1.25 × 0.4 mm
- Border fixing holes

##### Non-return damper

- Casing, material thickness 1.25 mm
- Blades, material thickness 1 mm
- Flanges on both sides, suitable for duct connection, with corner holes
- Additional side bar with fixing holes to accommodate the blade shafts and integral blade restrictors (pins)
- Blade restrictors prevent the blades from opening beyond a certain angle

#### Materials and surfaces

- Border, mullion and blades made of formed galvanised sheet steel or aluminium
- Wire mesh made of galvanised steel or stainless steel
- Casing and travel stop of the non-return damper made of galvanised sheet steel
- Blades made of formed aluminium
- Mullion (from B = 1000 mm) made of galvanised sheet steel
- Blade shafts made of brass
- Side bar made of PVC plastic
- Blade tip seals made of foamed polyester
- Blade restrictors made of plastic
- P1: Powder-coated, RAL CLASSIC colour
- PS: Powder-coated, NCS or DB colour

#### Maintenance

- Maintenance-free as construction and materials are not subject to wear
- Contamination should be removed as it may lead to corrosion and to increased closed blade air leakage

## TECHNICAL INFORMATION

Function, Technical data, Quick sizing, Specification text, Order code, related Products

#### Functional description

External weather louvres are externally mounted air transfer devices for the fresh air and exhaust air of air conditioning systems. They are installed in external walls and façades. Their narrowly arranged blades give good protection against the direct ingress of rain as well as against leaves and birds.

Under certain unfavourable conditions, such as heavy rain, and depending on the airflow velocity it might happen that slight quantities of water enter together with the air.

This is why the airflow velocity in fresh air openings should not exceed 2 – 2.5 m/s.

Non-return dampers close automatically.

When the system is in operation, the blades open when air flows.

When the system is shut down, the blades close due to their weight. They safely prevent air from flowing against the intended airflow direction.

**Schematic illustration of WG-KUL**

<b>Nominal sizes</b>	200 × 180 to 1600 × 1665 mm
<b>Free area</b>	Approx. 60 %, with insect screen approx. 45 %
<b>Total differential pressure – exhaust air</b>	55 Pa at 2.5 m/s
<b>Total differential pressure – fresh air</b>	60 Pa at 2.5 m/s
<b>Operating temperature</b>	-20 to 80 °C
<b>Maximum pressure</b>	100 Pa

Combinations of an external weather louvre and a non-return damper.

Rectangular external weather louvre as a protection of air conditioning systems against the direct ingress of rain, leaves and birds into fresh air and exhaust air openings.

Rectangular non-return damper to prevent air from flowing against the intended airflow direction.

Ready-to-install component which consists of a border, aerofoil rain defence blades, and a wire mesh at the rear.

Non-return damper which consists of a casing, blades with low-friction bearings, and travel stop and sealing parts.

#### Special characteristics

- Any intermediate sizes within the standard size range are available
- Low installation effort on site since external weather louvre and non-return damper are factory combined and assembled
- Operating temperature 20 – 80 °C
- For very large sizes, several combinations can be arranged side by side or on top of each other
- Maximum pressure of 100 Pa
- Low differential pressure due to aerofoil blades
- Non-return dampers are opened and closed by the airflow; no actuator is required

#### Materials and surfaces

- Border, mullion and blades made of formed galvanised sheet steel or aluminium
- Wire mesh made of galvanised steel or stainless steel
- Casing and travel stop of the non-return damper made of galvanised sheet steel
- Blades made of formed aluminium
- Mullion (from B = 1000 mm) made of galvanised sheet steel
- Blade shafts made of brass
- Side bar made of PVC plastic
- Blade tip seals made of foamed polyester
- Blade restrictors made of plastic
- P1: Powder-coated, RAL CLASSIC colour
- PS: Powder-coated, NCS or DB colour

#### Technical data

- Nominal sizes: 200 × 180 to 1600 × 1665 mm
- Free area: approx. 60 %, with insect screen approx. 45 %
- Total differential pressure – exhaust air: 55 Pa at 2.5 m/s
- Total differential pressure – fresh air: 60 Pa at 2.5 m/s
- Operating temperature: –20 – 80 °C
- Maximum pressure: 100 Pa

This specification text describes the general properties of the product. Texts for variants can be generated with our Easy Product Finder design programme.

**Notes on the order code**

© The nominal size equals the dimensions of the duct connected to the non-return damper. Depending on the size of the installation opening, an installation subframe may have to be used.

- Installation opening without installation subframe: B + 95 mm, H + 95 mm
- Installation opening with installation subframe: B + 115 mm, H + 115 mm

## WG-KUL

### Variants

- External weather louvre made of galvanised sheet steel, with non-return damper
- 1: Fresh air opening
- 2: Exhaust air opening

### Nominal sizes

- B: 200 – 1600 mm, in increments of 1 mm
- H: 180, 345, 510, 675, 840, 1005, 1170, 1335, 1500, 1665 mm (intermediate sizes 183 – 1664 in increments of 1 mm)
- Any combination of B × H

### Parts and characteristics

- Border
- Regular blades and bottom blade
- Wire mesh
- Optional insect screen
- Visible mullion or stabilising mullion at the rear, from B = 1385 mm
- Casing of non-return damper
- Blades with low-friction bearings
- Blade restrictors
- Blade tip seals
- Bottom travel stop (angle section)
- Visible mullion at the rear from B = 1000 mm

### Construction features

#### External weather louvre

- Free area of approx. 60 %, with insect screen approx. 45 %
- Wire mesh at the rear, mesh aperture 20 × 20 × 1.8 mm
- Optional insect screen at the rear, mesh aperture 1.25 × 1.25 × 0.4 mm
- Border fixing holes

#### Non-return damper

- Casing, material thickness 1.25 mm
- Blades, material thickness 1 mm
- Flanges on both sides, suitable for duct connection, with corner holes
- Additional side bar with fixing holes to accommodate the blade shafts and integral blade restrictors (pins)
- Blade restrictors prevent the blades from opening beyond a certain angle

### Materials and surfaces

#### External weather louvre

- P1: Powder-coated, RAL CLASSIC colour
- PS: Powder-coated, DB colour

## WG-AL-KUL

### Variant

- External weather louvre made of aluminium, with non-return damper
- 1: Fresh air opening
- 2: Exhaust air opening

### Nominal sizes

- B: 200 – 1600 mm, in increments of 1 mm
- H: 180, 345, 510, 675, 840, 1005, 1170, 1335, 1500, 1665 mm (intermediate sizes 183 – 1664 in increments of 1 mm)
- Any combination of B × H

### Parts and characteristics

- Border
- Regular blades and bottom blade
- Wire mesh
- Optional insect screen
- Visible mullion or stabilising mullion at the rear, from B = 1385 mm
- Casing of non-return damper
- Blades with low-friction bearings
- Blade restrictors
- Blade tip seals
- Bottom travel stop (angle section)
- Visible mullion at the rear from B = 1000 mm

### Construction features

#### External weather louvre

- Free area of approx. 60 %, with insect screen approx. 45 %
- Wire mesh at the rear, mesh aperture 20 × 20 × 1.8 mm
- Optional insect screen at the rear, mesh aperture 1.25 × 1.25 × 0.4 mm
- Border fixing holes

#### Non-return damper

- Casing, material thickness 1.25 mm
- Blades, material thickness 1 mm
- Flanges on both sides, suitable for duct connection, with corner holes
- Additional side bar with fixing holes to accommodate the blade shafts and integral blade restrictors (pins)
- Blade restrictors prevent the blades from opening beyond a certain angle

### Materials and surfaces

#### External weather louvre

- P1: Powder-coated, RAL CLASSIC colour
- PS: Powder-coated, DB colour
- S2: Anodised to EURAS standard, E6-C-31 ...35
- S3: Anodised to EURAS standard, E6-C-0

## Installation details, Basic information and nomenclature

### Installation and commissioning

- With or without installation subframe
- Vertical installation
- Straight upstream section required (at least  $B + H$ ) on the pressure side of fans
- Ensure a gradual start-up of fans to avoid a sudden pressure increase

### Wall installation without installation subframe

Illustration shows WG-KUL-1

Installation dimensions – WG-KUL-1, WG-KUL-2, WG-AL-KUL-1, WG-AL-KUL-2

- ① Fixing tab
- ② Hexagon head screw with washer
- ③ Installation subframe
